Tubes or semiconductors?

MAGNETOSOLID!

The name of this technology borrows for the combination of "ferromagnetic" with "solid state". Solid-state components are used in typical circuits for tube amplifiers.

We managed to combine the advantages of solid state and tube amplifiers, overcoming their respective limitations.

The result is a tight, precise and dynamic sound, yet gentle, airy, warm and pleasant: natural.

FUTURA		22.500 EUR	Fully balanced Mono 60W
DEMONE		30.000 EUR	Fully balanced Mono VHP 60W

All the polarizations are in Class A and without feedback. Each component is carefully selected. The result is a sound controlled, precise and dynamic, yet gentle, natural, airy, warm and pleasant. The extremes of Magnetosolid® technology, making use of ferromagnetic components even more refined and rich, originates amplifiers Magnetosolid-VHP.
